

Dr Erandathie Lokupitiya holds a BSc (Special) degree with Hons in Zoology from University of Colombo and an MSc (with research) from Department of Zoology and Physiology of University of Wyoming, USA. She received a PhD from the Graduate Degree Program in Ecology of Colorado State University, USA. She has both teaching and research experience as an academic and she was awarded the John P. Ellbogen Meritorious Classroom Teaching Award by the University of Wyoming, USA in 1998, and she is a two-time winner of the President's Award for Scientific Publication. She

joined the University of Colombo (UoC) in June 2012, after serving as a Research Scientist at the Department of Atmospheric Science of Colorado State University, USA, for over 4 years. Since she joined the UoC, she has been serving as the Coordinator of several new courses for undergraduate- and postgraduate level students, where she was involved in curriculum revision and introducing new course contents. For instance, she developed the curriculum for different modules of the recently introduced Postgraduate Diploma in Climate Change and Environmental Management offered by the university. Under the syllabi and courses she developed and introduced, the students are mostly exposed to student-centered-learning through assignments, independent studies and laboratory research projects.
