### **Reviewer Profile**

Dr. K Vivehananthan is a PhD scholar in Molecular Biology. She is currently the Head of the Department of Biotechnology in Wayamba University of Sri Lanka. Importantly, she is the Chairperson of the Faculty Quality Assurance Cell of the Faculty of Agriculture and Plantation Management and also she is one of the Student Counsellor at the Faculty. She received presidential scholarship and few fellowships to carry out research trainings in the field of Molecular Biology and Genetic Engineering. She is very much interested on multidisciplinary research projects to address the national needs. Her research outputs at the National and International forums received recognition and she was awarded as the best presenter at these forums and provided with cash awards. She delivered Keynote and Valedictory address in the International forums held in both Sri Lanka and India. As her ambitious is aligned with the vision of the QAAC of the UGC, being a reviewer of the University system which promises the way forward to fulfill the needs of the academic and scientific community in the country.
